

Statement

Personio – technical and organisational measures

29/07/2022

Page 1

In our opinion, the technical organisational measures described by Personio GmbH in version 07-2022 meet the requirements of Article 32 (Security of Processing) of the EU General Data Protection Regulation (GDPR).

Taking into account the state of the art, the implementation costs and the nature, scope, circumstances and purposes of the processing, as well as the different probability and severity of the risk to the rights and freedoms of natural persons, they are suitable measures to ensure an adequate level of protection for the risks regularly arising from the operation of personnel management software.

For the typical use of Personio software, these technical and organisational measures therefore allow the contracting entity to provide evidence of the careful selection of Personio GmbH as a data processor in accordance with Article 28 of the EU GDPR. The contracting entity is responsible for evaluating the measures in the event of a different risk profile.

The measures are state of the art and are therefore continuously further developed.
